Internet http://www.potentiometers.com
Now almost any special combination potentiometer you specify can be manufactured and shipped soon after your order is received.

Since Clarosystem and Mod Pot potentiometers are modular in construction, we can produce prototype quantities of 1/2 or 5/8 inch square, conductive plastic, cermet, or hot molded carbon pots for you in just a few hours . . . . and even production quantities in a matter of days with our VIP (Very Important Potentiometer) service!

Over one billion combinations of single, dual, triple, quad arrangements, push-pull or rotary switches and hundreds of shaft terminal variations can be produced.

If you need a potentiometer and you need it fast, call our product manager or fax us your requirements using the Custom Potentiometer Order Forms included in this catalog.
Series 70, 72
Hot-Molded Carbon*, Conductive Plastic (CP), and Cermet Panel Potentiometers

Unmatched Flexibility

The MOD POT® Family includes:
Series 70 – Metal or Plastic Shaft – Metal Bushing.
Series 72 – Metal or Plastic Shaft – Plastic Bushing.

Features
- Modular Construction
- 50 Ohms to 10 Megohms
- Linear and Non-Linear Tapers
- Multiple Sections/Concentric Shafts
- Rotary and Push-Pull Switch Options
- Multi-Turn (Vernier) Option
- Attenuators
- 0.625 Inch (15.87 mm) Square
- 1/4" or 1/8" Shaft Diameter
- Metal or Plastic Shaft
- RoHS Compliant

Benefits
- Versatility
- Wide Resistance Range
- Versatility
- Versatility
- Versatility
- Versatility
- Versatility
- Versatility
- Moderate Size
- Versatility
- Non-Magnetic
- International Acceptance

Disclaimer
Due to the unlimited design combinations, certain designs may not perform in accordance with all of the specifications

* Hot Molded Carbon is no longer available
**SPECIFICATIONS**

**General**

**Versatile Panel Potentiometer**
The MOD POT® concept consists of standardized potentiometer modules that can be mixed and matched in over a billion combinations. Now, you can be far more imaginative with potentiometers because you can get special combinations with the ease of standards.

Allen-Bradley originated the modular potentiometer concept in response to requests from design engineers who wanted virtually unlimited variety in variable resistors for greatly increased design freedom.

MOD POT® modules are 5/8 inch square by about 1/2 inch deep. This provides minimum center-to-center distance for compact panel mounting. You can gang resistance and switch modules in combinations of up to four modules. Select from a whole family of resistive elements, resistive values and tolerances, tapers, shafts, bushings, lug options and more. You get a virtually unlimited number of design options.

**TEMPERATURE RANGE**

<table>
<thead>
<tr>

</tbody>
</table>

**Hardware** – Hardware is: .250 inch (6.35 mm) diameter bushing: (1) M-4748; (1) M-4721; (1) M-4761 (M-4761 is supplied only with locking bushings).

4.375 inch (9.52 mm) diameter bushing: (1) M-2898; (1) M-2786; (1) M-3638 (M-3638 is supplied only with locking bushings).

All hardware shipped in bulk — not assembled unless otherwise specified.

**Mounting Torque (Series 72)** – Torque applied to the mounting nuts should not exceed 7 inch-pounds (790 mN-m) for the .250 inch (6.35mm) diameter bushing or 14 inch-pounds (1580 mN-m) for the .375 inch (9.52 mm) diameter bushing.

* Hot Molded Carbon is no longer available

**Turning Torque** – Initially, at 25°C, the potentiometer torque will be 0.5 inch-ounce (3.5 mN-m) minimum while the maximum is:

<table>
<thead>
<tr>
<th>Style</th>
<th>TORQUE INCH-OUNCES (mN-m)</th>
</tr>
</thead>
<tbody>
<tr>

<td>6 (42)</td>
</tr>
<tr>
<td>Triple</td>
<td>8 (56)</td>
</tr>
<tr>
<td>Quad</td>
<td>10 (71)</td>
</tr>
</tbody>
</table>

Variation within a control is 1 oz. in. maximum.

The maximum additional torque required for the multi-turn vernier drive is 10 inch-ounces (71mN-m) on inner, coarse adjustment shaft.

**Stop Torque** – Minimum of 4 inch-pounds (451 mN-m) except for the Series 72 with a .125 inch (3.18 mm) diameter shaft which is 2 inch-pounds (225 mN-m) minimum. Multi-turn vernier drives have slip clutches.

**Rotation**

</tr>
</tbody>
</table>

**Multi-Turn Vernier drive** – Two multi-turn vernier drive modules are available with hot-molded*, cermet, and conductive plastic modules. Through a gearing arrangement, the total rotation will be changed to 16 turns or 4 turns. A ratchet clutch is provided in place of fixed stops for the fine adjustment shaft. Series 70 variable resistors may have concentric shafts. The inner concentric shaft (.078 inch (1.98 mm) diameter) may be used as a coarse adjustment shaft.

**Enclosure** – Dust and splash resistant. They are not immersion sealed.

**Materials** – Corrosion-resistant and essentially nonmagnetic. The shafts and bushings of the Series 72 are plastic.

**Standard Marking** – State Electronics part number and nominal total resistance are marked in two lines. Other markings are possible.
**Electrical**

**Total resistance tolerances** – Hot-Molded*, CP: ±10% or ±20%; Cermet: ±5% or ±10%.

**Power derating** – Derate power linearly from rated temperature to zero at maximum temperature. Derate 50 percent for hot-molded elements with "A", "B", "S", and "DB" tapers. Derate 50 percent for CP elements with "A", "B", "S", and "DB" tapers. For rheostat applications, derate power directly with shaft or actuator position.

**Voltage** – 350 volts maximum working voltage (RMS or DC), or as determined by $E_{\text{max}} = \sqrt{PR}$, whichever is less (at sea level).

Consult factory for further details
A=Available
NA=Not Available

**Linearity** – ±5 percent independent for linear tapers with a total resistance up to 1.0 megohm.

**Dielectric withstanding voltage** – Maximum continuous voltage, 350 Volts (RMS) at sea level. One second test of 1000 Volts (RMS) at sea level. 500 VAC (RMS) at 3.4 inches (86.36mm) mercury, equivalent to 50,000 feet. ([Glossary Definition Link](#))

**Insulation resistance** – 1000 megohms minimum for clean and dry conditions at +25 ºC.

**Operational**

**Contact resistance variation** – linear taper – Maximum value is: Hot-Molded* & Cermet: 1.5 percent of nominal resistance value or 1.5 ohms, whichever is greater. CP: 1.0 percent of nominal resistance value.

**Load Life** – Maximum change in total resistance as a result of a 1000 hour test at rated power across entire element at +70° C (1.5 hours "ON", 0.5 hour "OFF") 5 percent for cermet element, 10 percent for hot-molded* and CP elements

**Rotational life** – 10 percent maximum change in total resistance as a result of a 100,000 mechanical cycle life test without load.

**Environmental**

**Vibration** – 2 percent maximum change in total resistance, 5 percent maximum change in resistance setting. (Tested per method 204, condition “C” of MIL-STD-202J.) Applicable to single shaft potentiometers only.

**Shock** – 2 percent maximum change in total resistance, 5 percent maximum change in resistance setting. (Tested per method 213, condition “I” of MIL-STD-202J.) Applicable to single shaft potentiometers only.

**Humidity** – Maximum change in total resistance as a result of 95 percent humidity at 40° C for 100 hours: 5 percent for cermet element, 10 percent for hot-molded and CP elements.

**Temperature cycling** – 3 percent maximum change in total resistance as a result of the temperature cycling test. (Five cycles at –55° C to the maximum temperature.)

**Effect of soldering** – Maximum change in total resistance as a result of immersing the terminals in 350° C solder to within 0.125 inch (3,18mm) of the resistor body for 5 seconds: 1 percent for cermet element, 2 percent for hot-molded and CP elements.

**Low temperature operation** – Maximum change in total resistance as a result of the low temperature operation test (–55° C for two hours without load and 45 minutes with rated load): 2 percent for cermet element; 3 percent for hot-molded and CP elements.

**High temperature exposure** – Maximum change in total resistance as a result of the high temperature exposure test (maximum rated temperature for 1000 hours without load): 4 percent for cermet element; 10 percent for hot-molded and CP elements.

**Washability** – MOD POT® performance may be adversely affected if subjected to conventional after-solder boardwash processes.

* Hot Molded Carbon is no longer available
Environmental (continued)

Temperature characteristics – Maximum percent temporary total resistance change from the +25°C value. See chart below.

Switches

Rotary Switch – Maximum percent temporary total resistance change from the +25°C value. See chart below.

Rotary Switch – The rotary switch consists of two sets of contacts. See Part Number Explanation for available options. When supplied on the Series 72, the rotary switch must be used with a .250 inch (6.35 mm) diameter shaft.

Push-pull Switch – A four pole switch that is operated by a .125 inch (3,18mm) diameter solid shaft. An inner concentric shaft that operated the push-pull switch only may have a diameter of .125 inch (3,18mm) or .078 inch (1,98mm). Shaft lengths are measured from the bushing mounting surface to the free end of the shaft with the shaft in the extended position. Available only on Series 70.

Momentary Push Switch – A push-pull switch equipped with a return spring such that the switch will return to the extended position when the actuating force is removed. Available only on Series 70.

Ambient Temperature – –55°C to +100°C

Life – The switches will be electrically and mechanically operative after operational life test at rated current and voltage with a resistive load, per switch characteristics below.

Terminals – Switches are available with lug terminals only. They are not available with square terminals. On request, switches will be rotated 90° such that the switch terminals come out the sides of the control instead of the top and bottom.

**Configuration Lug Terminals**

- **Basic Type**: MOD POT® Series 70 Series 72

**Configuration Lug Terminals**

- A – Single (Hot Molded)
- B – Single (Cermet)
- J – Single (Conductive Plastic)
- C – Dual (Hot Molded)
- D – Dual (Cermet)
- T – Dual (Conductive Plastic)
- E – Triple (Hot Molded)
- F – Triple (Cermet)
- G – Quad (Hot Molded)
- H – Quad (Cermet)
- K – Single (Hot Molded) with Switch 1001
- L – Single (Cermet) with Switch 1001

**Square Terminals**

- M – Single (Hot Molded)
- N – Single (Cermet)
- U – Single (Conductive Plastic)
- P – Dual (Hot Molded)
- R – Dual (Cermet)
- W – Dual (Conductive Plastic)

1. **CONCENTRIC AND SPECIAL SHAFTS REQUIRE SPECIAL PART NUMBER ISSUED BY THE FACTORY.**

**Disclaimer**: Due to the unlimited design combinations, certain designs may not perform in accordance with all of the specifications.

**CAUTION**: Not all part number combinations are valid. Check parameter limits in text.

**EXAMPLE**: 70A1N024P501U

Invalid Bushing/Shaft Combination
Plain .375 inch (9.52 mm) long bushing with plain .375 inch (9.52 mm) long shaft.

*Hot Molded Carbon is no longer available*
### Common Combinations

The MOD POT® Potentiometer is available in single, dual, triple, and quadruple construction. This includes potentiometer, switch and multi-turn vernier drive modules. The table below lists some of the options available for single and multi-section controls. Because of the versatility of the MOD POT® Potentiometer, many other options are available. Momentary push switches may be used in place of push-pull switches in the listed combinations.

**NOTES:**
1. The outer shaft operates Sections #1 and #2.
2. The outer shaft operates Sections #1, #2, and #3.
3. The inner shaft (.078 [1.98 mm] diameter) is for the coarse adjustment, the outer shaft for the fine adjustment.
4. Series 72 must have .250 inch (6.35 mm) diameter shaft.
5. Available in 70 Series only.
6. Hot Molded Carbon is no longer available.

Shaft is cross slotted for screwdriver actuation. Flush with faceplate.
Mounting bushings are supplied with 32-NEF-2A thread. All bushing lengths measured from the mounting face to the end of the bushing.
A = Available. NA = Not Available.

Bushing, Shaft and Hardware Dimensions are shown on Page 69-70
**Ordering Information**

1. Basic type (Series 70, Series 72)
2. Type of element (cermet or conductive plastic (CP)).
3. Type of terminals (resistor element only).
4. Number of sections.
5. Taper (each element on multi-section controls).
6. Total resistance value in ohms (each element on multi-section controls).
7. Tolerance percent (each element on multi-section controls).
8. Bushing type (plain or locking).
9. Bushing length in inches or millimeters.
10. Bushing diameter \(0.375\) (9.52mm) or \(0.250\) (6.35mm)
11. Shaft ending (plain, slotted or flatted).
12. Shaft length FMS in inches or millimeters.
13. Shaft material: plastic or metal.
14. Switch type. (maximum 2 rotary switches per shaft)
15. Multi-Turn Vernier drive.
16. Locating lug option.
17. Mounting hardware.
18. Your part number, if any.
19. Marking requirement on the part.
20. Special features. (Forward complete detailed specs)

Section 1: Single Module, Single Shaft
1A Single Potentiometer, Single Shaft, Solder Lugs

Dimension Notes:
- T1 = .175±.010 (4.45±0.25)
- T2 = .100±.010 (2.54±0.25)
- T3 = CP Element: .85±.005 (2.16±0.13); Cermet: .125Max
- T4 = CP Element: .015±.002 (0.38±0.05); Cermet: .025±.002 (0.64±0.05)
- Terminal hole size: .047±.005 x .078±.005 (1.19±0.13 x 1.98±0.13)

1A-PC Single Potentiometer, Single Shaft, Solder Pins

Dimension Notes:
- T1 = .200±.010 (5.08±0.25)
- T2 = .025±.002 (0.64±0.05)

Notes:
2. CP Plating - Terminals 1 & 3: .015" ± .001 Soft Copper CDA Alloy 110, Plate 50 ~ 200 Microinches Bright Tin, Whisker-Free (RoHS).
4. CP Plating - Terminal 2: .015" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
5. Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
6. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
Section 1: Single module, Single Shaft (continued)

2A Single Rotary Switch, Single Shaft, Solder Lugs

Switch Option specifications

Notes:
1. Cermet Plating - Terminals 1 & 3: .025” ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   CP Plating - Terminals 1 & 3: .015” ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   Cermet Plating - Terminal 2: .025” ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   CP Plating - Terminal 2: .015” ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
2. All drawings are shown with 3/8” dia. bushing with 1/4” dia. shaft. 1/4” dia. bushing with 1/8” dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ±.016 (0.40), except as specified.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.
Section 2: Dual module, Single Shaft

4A Dual Potentiometer, Single Shaft, Solder Lugs

4A-PC Dual Potentiometer, Single Shaft, Solder Pins

Notes:
1. Cermet Plating - Terminals 1 & 3: .025" ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   CP Plating - Terminals 1 & 3: .015" ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   Cermet Plating - Terminal 2: .025" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   CP Plating - Terminal 2: .015" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
2. All drawings are shown with 3/8” dia. bushing with 1/4” dia. shaft. 1/4” dia. bushing with 1/8” dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
   Refer to Page 70 for Locating Lug options.
4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ±.016 (0.40), except as specified.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.
5A Single Potentiometer, Single DPST Rotary Switch, Solder Lugs

Switch Option Specifications

5A-90° Single Potentiometer, Single DPST Rotary Switch, Solder Lugs (Rotated Switch Module)

Dimension Notes:

1. Cermet Plating - Terminals 1 & 3: .025 ± .001 Soft Copper CDA Alloy 110, Bright Tin, Whisker-Free (RoHS)
   CP Plating - Terminals 1 & 3: .015 ± .001 Soft Copper CDA Alloy 110, Bright Tin, Whisker-Free (RoHS)
   Cermet Plating - Terminals 2: .025 ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   CP Plating - Terminals 2: .015 ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.

2. All drawings are shown with 3/8” dia. bushing with 1/4” dia. shaft. 1/4” dia. bushing with 1/8” dia. shaft is available. Locking bushing is also available.

3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
   Refer to Page 70 for Locating Lug options.

4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ±.016 (.04), except as specified.

5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.

6. Drawings are not to scale.

Notes:

1. Cermet Plating - Terminals 1 & 3: .025 ± .001 Soft Copper CDA Alloy 110, Bright Tin, Whisker-Free (RoHS)
   CP Plating - Terminals 1 & 3: .015 ± .001 Soft Copper CDA Alloy 110, Bright Tin, Whisker-Free (RoHS)
   Cermet Plating - Terminal 2: .025 ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   CP Plating - Terminal 2: .015 ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.

2. All drawings are shown with 3/8” dia. bushing with 1/4” dia. shaft. 1/4” dia. bushing with 1/8” dia. shaft is available. Locking bushing is also available.

3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
   Refer to Page 70 for Locating Lug options.

4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ±.016 (.04), except as specified.

5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.

6. Drawings are not to scale.
5A-PC Single Potentiometer, Single DPST Rotary Switch, PC Pins

**Switch Option specifications**

### 5A-PC-90° Single Potentiometer, Single DPST Rotary Switch, PC Pins (Rotated Switch Module)

**Notes:**

1. Cermet Plating - Terminals 1 & 3: .025" ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   - CP Plating - Terminals 1 & 3: .015" ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   - Cermet Plating - Terminal 2: .025" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   - CP Plating - Terminal 2: .015" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   - Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.

2. All drawings are shown with 3/8" dia. bushing with 1/4" dia. shaft. 1/4" dia. bushing with 1/8" dia. shaft is available. Locking bushing is also available.

3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
4. Refer to Page 70 for Locating Lug options.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.
Section 2: Dual module, Single Shaft (continued)

5B Single Potentiometer, Single Push-Pull Switch, Solder Lugs

5B-90° Single Potentiometer, Single Push-Pull Switch, Solder Lugs (Rotated Switch Module)

Notes:
1. Cermet Plating - Terminals 1 & 3: .025" ± .001 Soft Copper CDA Alloy 110, Plate 20 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   CP Plating - Terminals 1 & 3: .015" ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   Cermet Plating - Terminal 2: .025" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   CP Plating - Terminal 2: .015" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
2. All drawings are shown with 3/8" dia. bushing with 1/4" dia. shaft. 1/4" dia. bushing with 1/8" dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ±.016 (.40), except as specified.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.
### Switch Option specifications

**5B-PC** Single Potentiometer, Single Push-Pull Switch, PC Pins

**5B-PC-90°** Single Potentiometer, Single Push-Pull Switch, PC Pins (Rotated Switch Module)

#### Dimension Notes:

- **T1** = .200 ± .010 (5.08 ± 0.25)
- **T2** = .015 ± .002 (0.38 ± 0.05)
- **T3** = .085 ± .005 (2.16 ± 0.13)
- **T4** = .025 ± .002 (0.64 ± 0.05)

Terminal hole size: .047 ± 0.005 x .078 ± 0.005 (1.19 ± 0.13 x 1.98 ± 0.13)

Note: Shaft length is measured in outer position.

---

**Notes:**

1. Cermet Plating - Terminals 1 & 3: .025 ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   - CP Plating - Terminals 1 & 3: .015 ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   - Cermet Plating - Terminal 2: .025 ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   - CP Plating - Terminal 2: .015 ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
2. All drawings are shown with 3/8" dia. bushing with 1/4" dia. shaft. 1/4" dia. bushing with 1/8" dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for **Bushing, Shaft and Hardware dimensions**.
4. Refer to Page 70 for **Locating Lug options**.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.
Section 2: Dual module, Single Shaft (continued)

6A Potentiometer with Multi-Turn Vernier Drive, Single Shaft, Solder Lugs

Dimension Notes:
T1 = .175±.010 (4.45±0.25)
T2 = CP Element .085±.005 (2.16±0.13); Cermet .125Max
T3 = CP Element .015±.002 (0.38±0.05); Cermet .025±.002 (0.64±0.05)
T4 = CP Element .345 (8.76); Cermet .362 (9.19)
Terminal hole size: .047 x .078 (1.19 x 1.98)

6A-PC Potentiometer with Multi-Turn Vernier Drive, Single Shaft, Solder Pins

Dimension Notes:
T1 = .200±.010 (5.08±0.25)
T2 = .025±.002 (0.64±0.05)

Notes:
1. Cermet Plating - Terminals 1 & 3: .025” ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   CP Plating - Terminals 1 & 3: .015” ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   Cermet Plating - Terminal 2: .025” ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   CP Plating - Terminal 2: .015” ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
2. All drawings are shown with 3/8” dia. bushing with 1/4” dia. shaft. 1/4” dia. bushing with 1/8” dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
   Refer to Page 70 for Locating Lug options.
4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ±.016 (0.40), except as specified.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.
Section 3: Dual module, Concentric Shaft

7A Dual Potentiometer, Concentric Shaft, Solder Lugs

Dimension Notes:
T1 = .175±.010 (4.45±0.25)
T2 = .275±.010 (6.98±0.25)
T3 = CP Element .085±.005 (2.16±0.13); Cermet .125Max

2. All drawings are shown with 3/8” dia. bushing with 1/4” dia. shaft. 1/4” dia. bushing with 1/8” dia. shaft is available. Locking bushing is also available.

3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
   Refer to Page 70 for Locating Lug options.

4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ± .016 (0,40), except as specified.

5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.

6. Drawings are not to scale.
12B - Dual Potentiometer, Push-Pull Switch, Solder Lugs

Switch Option specifications

12B-90° Dual Potentiometer, Push-Pull Switch, Solder Lugs (Rotated Switch Module)

Notes:
1. Cermet Plating - Terminals 1 & 3: .025" ± .001 Soft Copper CDA Alloy 110, Plate 50–200 Microinches Bright Tin, Whisker-Free (RoHS)
   CP Plating - Terminals 1 & 3: .015" ± .001 Soft Copper CDA Alloy 110, Plate 50–200 Microinches Bright Tin, Whisker-Free (RoHS)
   Cermet Plating - Terminal 2: .025" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   CP Plating - Terminal 2: .015" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
2. All drawings are shown with 3/8" dia. bushing with 1/4" dia. shaft. 1/4" dia. bushing with 1/8" dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ±0.016 (0.40), except as specified.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.
Section 4: Triple module, Single Shaft (continued)

12B-PC Dual Potentiometer, DPST Push-Pull Switch, PC Pins

Notes:
1. Cermet Plating - Terminals 1 & 3: .025" ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   CP Plating - Terminals 1 & 3: .015" ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
2. All drawings are shown with 3/8" dia. bushing with 1/4" dia. shaft. 1/4" dia. bushing with 1/8" dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ±.016 (0.40), except as specified.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.

Switch Option specifications

12B-PC-90° Single Potentiometer, DPST Push-Pull Switch, PC Pins (Rotated Switch Module)

Notes:
1. Cermet Plating - Terminals 1 & 3: .025" ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   CP Plating - Terminals 1 & 3: .015" ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
2. All drawings are shown with 3/8" dia. bushing with 1/4" dia. shaft. 1/4" dia. bushing with 1/8" dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ±.016 (0.40), except as specified.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.
Section 4: Triple module, Single Shaft (continued)

12C Single Potentiometer, Rotary Switch, and Push-Pull Switch, Solder Lugs

Switch Option specifications

12C-90° Single Potentiometer, Rotary Switch, and Push-Pull Switch, Solder Lugs (Rotated Switch Module)

Notes:
1. Cermet Plating - Terminals 1 & 3: .025" ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microniches Bright Tin, Whisker-Free (RoHS)
   CP Plating - Terminals 1 & 3: .015" ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microniches Bright Tin, Whisker-Free (RoHS)
   Cermet Plating - Terminal 2: .025" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microniches Gold.
   CP Plating - Terminal 2: .015" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microniches Gold.
   Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microniches Gold.
2. All drawings are shown with 3/8" dia. bushing with 1/4" dia. shaft. 1/4" dia. bushing with 1/8" dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ±.016 (0.40), except as specified.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.
12C-PC Single Potentiometer, Rotary Switch, and Push-Pull Switch, PC Pins

Switch Option specifications

12C-PC-90° Single Potentiometer, Rotary Switch, and Push-Pull Switch, PC Pins (Rotated Switch Module)

Dimension Notes:
T1 = .200 ± .010 (5.08 ± 0.25)
T2 = .085 ± .005 (2.16 ± 0.13)
T3 = .015 ± .002 (0.38 ± 0.05)
T4 = .025 ± .002 (0.64 ± 0.05)
Terminal hole size: .047 ± .005 x .078 ± .005 (1.19 ± 0.13 x 1.98 ± 0.13)

Note: Shaft length is measured in outer position

Notes:
1. Cermet Plating - Terminals 1 & 3: .025 ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   CP Plating - Terminals 1 & 3: .015 ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   Cermet Plating - Terminal 2: .025 ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   CP Plating - Terminal 2: .015 ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
2. All drawings are shown with 3/8” dia. bushing with 1/4” dia. shaft. 1/4” dia. bushing with 1/8” dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ±0.016 (0.40), except as specified.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.
Section 4: Triple module, Single Shaft (continued)

13A - Dual Potentiometer, Single Rotary Switch, Solder Lugs

Dimension Notes:

\[
\begin{align*}

**Note:** Shaft length is measured in outer position.

### Notes:
1. Cermet Plating - Terminals 1 & 3: 0.001 Soft Copper CDA Alloy 110, Plate 10 – 200 Microniches Bright Tin, Whisker-Free (RoHS)
   - CP Plating - Terminals 1 & 3: 0.001 Soft Copper CDA Alloy 110, Plate 10 – 200 Microniches Bright Tin, Whisker-Free (RoHS)
2. All drawings are shown with 3/8" dia. bushing with 1/4" dia. shaft. 1/4" dia. bushing with 1/8" dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
4. Refer to Page 70 for Locating Lug options.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.
Section 5: Triple module, Concentric Shaft (continued)

18A-PC Single Potentiometer, Rotary Switch, and Push-Pull Switch, Concentric Shaft, Solder Lugs

Switch Option specifications

Dimension Notes:
T1 = .200±.010 (5.08±0.25)
T2 = .359±.010 (9.13±0.25)
T3 = .122±.010 (3.10±.25)
T4 = .015±.002 (0.38±0.05)
T5 = .085±.005 (2.16±.13)
T6 = .025±.002 (0.64±.05)
Terminal hole size: .047±.005 x .078±.005 (1.19±0.13 x 1.98±.13)
Note: Shaft length is measured in outer position

Notes:
1. Cermet Plating - Terminals 1 & 3: .025± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   CP Plating - Terminals 1 & 3: .015± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   Cermet Plating - Terminal 2: .025± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   CP Plating - Terminal 2: .015± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
2. All drawings are shown with 3/8" dia. bushing with 1/4" dia. shaft. 1/4" dia. bushing with 1/8" dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
4. Drawings are not to scale.
Section 5: Triple module, Concentric Shaft (continued)

19A Dual Potentiometer with Multi-Turn Vernier Drive, Concentric Shaft, Solder Lugs

19A-PC Dual Potentiometer with Multi-Turn Vernier Drive, Concentric Shaft, Solder Pins

Notes:
1. Cermet Plating - Terminals 1 & 3: .025" ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   CP Plating - Terminals 1 & 3: .015" ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   Cermet Plating - Terminal 2: .025" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   CP Plating - Terminal 2: CP Element .015 ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
2. All drawings are shown with 3/8" dia. bushing with 1/4" dia. shaft. 1/4" dia. bushing with 1/8" dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
4. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
5. Drawings are not to scale.
Section 5: Triple module, Concentric Shaft (continued)

20A - Multi-Turn Vernier, Potentiometer, and Rotary Switch, Concentric Shaft, Solder Lugs

20A-90° - Multi-Turn Vernier, Potentiometer, and Rotary Switch, Concentric Shaft, Solder Lugs (Rotated Switch)

Notes:
1. Cermet Plating - Terminals 1 & 3: .025" ± .001 Soft Copper CDA Alloy 110, Plate 20 - 200 Microinches Bright Tin, Whisker-Free (RoHS)
2. All drawings are shown with 3/8” dia. bushing with 1/4” dia. shaft. 1/4” dia. bushing with 1/8” dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ±.016 (0.40), except as specified.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.
Section 5: Triple module, Concentric Shaft (continued)

20A-PC - Multi-Turn Vernier, Potentiometer, and Rotary Switch, Solder Lugs

Switch Option specifications

20A-PC-90° - Multi-Turn Vernier, Potentiometer, and Rotary Switch, Solder Lugs (Rotated Switch Module)

Notes:
1. Cermet Plating - Terminals 1 & 3: .025" ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   Cermet Plating - Terminal 2: .015" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
CP Plating - Terminals 1 & 3: .015" ± .001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
CP Plating - Terminal 2: .015" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
2. All drawings are shown with 3/8" dia. bushing with 1/4" dia. shaft. 1/4" dia. bushing with 1/8" dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
   Refer to Page 70 for Locating Lug options.
4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ±.016 (0.40), except as specified.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.
Section 6: Quad module, Single Shaft

23A Quad Potentiometer, Single Shaft, Solder Lugs

23A-PC Quad Potentiometer, Single Shaft, Solder Pins

Notes:
1. Cermet Plating - Terminals 1 & 3: .025” ±.001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   CP Plating - Terminals 1 & 3: .015” ±.001 Soft Copper CDA Alloy 110, Plate 50 – 200 Microinches Bright Tin, Whisker-Free (RoHS)
   Cermet Plating - Terminal 2: .025” ±.001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   CP Plating - Terminal 2: .015” ±.001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
2. All drawings are shown with 3/8” dia. bushing with 1/4” dia. shaft. 1/4” dia. bushing with 1/8” dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions. Refer to Page 70 for Locating Lug options.
4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ±.016 (0.40), except as specified.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.
Section 6: Quad module, Single Shaft (continued)

23B - Triple Potentiometer, Push-Pull Switch, Solder Lugs

23B-90° - Triple Potentiometer, Push-Pull Switch, Solder Lugs (Rotated Switch Module)

Notes:
1. Cermet Plating - Terminals 1 & 3: .025" ± .001 Soft Copper CDA Alloy 110, Plate 200 Microinches Bright Tin, Whisker-Free (RoHS)
   CP Plating - Terminals 1 & 3: .015" ± .001 Soft Copper CDA Alloy 110, Plate 200 Microinches Bright Tin, Whisker-Free (RoHS)
   Cermet Plating - Terminal 2: .025" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   CP Plating - Terminal 2: .015" ± .001 Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
   Switches, All Terminals - Soft Copper CDA Alloy 110, Plate 20 Microinches Gold.
2. All drawings are shown with 3/8" dia. bushing with 1/4" dia. shaft. 1/4" dia. bushing with 1/8" dia. shaft is available. Locking bushing is also available.
3. Refer to Page 69 for Bushing, Shaft and Hardware dimensions.
4. Basic dimensions are in inches. Dimensions in parentheses are in millimeters. Dimensional Tolerance ±.016 (0.40), except as specified.
5. Terminal Numbers are for reference only. Numbers are NOT printed on the device.
6. Drawings are not to scale.

**Mounting Hardware for 1/4" Bushing**

- **LOCK WASHER** M-4748
- **MOUNTING NUT** M-4721
- **LOCK NUT** M4761

**Max. Mounting Panel Thickness**:

- .062 – .188 (1.59 – 4.76)

When used with one standard M-2898 Lock Washer and one standard M-2786 Mounting Nut.

---

*Standard Bushing and Shaft Dimensions are shown on Page 11*

---

**Dimensions**

- Basic dimensions are in inches.
- Dimensions shown in parentheses are in millimeters.

**Tolerance**

- Dimensional tolerance ±.016 (0.40)
- Angular tolerance ± 5°, except as specified.
**DIMENSIONS**

**Bushing, Shaft and Hardware Dimensions (continued)**

### 1/4" Standard Flatted Shaft

- **Flat is opposite Movable Contact**

### 1/4" Standard Concentric Flatted Shaft

- **Flat is opposite Movable Contact**

### 1/4" Standard Slotted Shaft

- **Screwdriver slot is in line with movable contact**

### 1/4" Standard Concentric Slotted Shaft

- **Screwdriver slot is in line with movable contact**

### 1/8" Standard Flatted Shaft

- **Flat is opposite Movable Contact**

### 1/8" Standard Slotted Shaft

- **Screwdriver slot is in line with movable contact**

### 1/8" Concentric Shafts

- **Only plain endings are available on these concentric shafts**

---

Flat will extend to within .031 (0,79) of mounting bushing where shaft length will not permit standard flat.

All shafts are shown in extreme counterclock-wise position. Angle applies to potentiometers only.

---

*Standard Bushing and Shaft Dimensions are shown on Page 11*

### Mounting Holes

![Mounting Holes Diagram]
**DIMENSIONS**

Master Assembly Drawing

All drawings are shown with 3/8" dia. bushing with 1/4" dia. shaft.
1/4" diameter bushing with 1/8" diameter shaft is available.
Locking bushing is also available.

Refer to Page 70 for **Locating Lug options**.

**Multi-Turn Vernier Drive** module. Only one module of this type can be included in an assembly. A Multi-Turn Vernier Drive module must always be in the front location.

**Potentiometer (Pin terminal)** module. Up to four modules of this type can be included in an assembly.

**Potentiometer (lug terminal)** module. Up to four modules of this type can be included in an assembly.

**Rotary Switch** module. Multiple modules of this type can be included in an assembly. This module can be assembled sideways if needed for easier access to solder lugs.

Refer to Page 70 for **Switch options**.

**Push-Pull / Momentary-Push Switch** module includes backplate. Only one module of this type can be included in an assembly. This module must always be in the rear position. This module can be assembled sideways if needed for easier access to solder lugs.

Refer to Page 70 for **Switch options**.

**Spacer D12319, Spacer D12348** (without flange)
- installed in front of either first resistive module or rotary switch coupled to a push-pull or momentary push switch with solid shaft construction.
- placed behind the .075 inch flanged spacer attached to a lug terminal resistive module with concentric shaft construction
- or placed between switch and bushing assembly with solid shaft construction when only a push-pull or momentary push switch is in the build up.

**Spacer D12301** is installed between either two lug terminal resistive modules or when a rotary switch follows a rotary switch with concentric shaft construction.

**Spacer D12300** is installed between either two pin terminal resistive modules or two rotary switches with concentric shaft.

**Spacer D12349** is installed between a pin terminal resistive and/or a rotary switch and a pin terminal resistive module and/or a rotary switch, in any combination, coupled to a push-pull or momentary push switch with concentric shaft.

**Backplate D12303** is used except when last module is a push-pull or momentary push switch.

GLOSSARY OF TERMS

Input and Output Terms

Output Voltage
(e) The voltage between the wiper terminal and the designated reference point. Unless otherwise specified, the designated reference point is the CCW terminal (See 3.1).

Output Ratio
(e/E) The ratio of the output voltage to the designated input reference voltage. Unless otherwise specified, the reference voltage is the total applied voltage.

Rotation and Translation

Total Mechanical Travel
The total travel of the shaft between integral stops, under the specified stop load. In potentiometers without stops, the mechanical travel is continuous.

Mechanical Overtravel - Wirewound
The shaft travel between each End Point (or Theoretical End Point for Absolute Conformity or Linearity units) and its adjacent corresponding limit of Total Mechanical Travel.

Mechanical Overtravel
The shaft travel between each Theoretical End Point and its adjacent corresponding limit of Total Mechanical Travel.

Backlash
The maximum difference in shaft position that occurs when the shaft is moved to the same actual Output Ratio point from opposite directions.

Theoretical Electrical Travel
The specified shaft travel over which the theoretical function characteristic extends between defined Output Ratio limits, as determined from the Index Point.

Electrical Overtravel - Nonwirewound
The shaft travel over which there is continuity between the wiper terminal and the resistance element beyond each end of the Theoretical Electrical Travel.

Electrical Continuity Travel
The total travel of the shaft over which electrical continuity is maintained between the wiper and the resistance element.

Tap Location
The position of a tap relative to some reference. This is commonly expressed in terms of an Output Ratio and/or a shaft position. When a shaft position is specified, the Tap Location is the center of the Effective Tap Width.

Resistance

End Resistance
The resistance measured between the wiper terminal and an end terminal with the shaft positioned at the corresponding End Point.

Temperature Coefficient Of Resistance
The unit change in resistance per degree celsius change from a reference temperature, expressed in parts per million per degree celsius as follows:

\[ T.C. = \frac{R_2 - R_1}{R_1(T_2 - T_1)} \times 10^6 \]

Where:
R1 = Resistance at reference temperature in ohms.
R2 = Resistance at test temperature in ohms
T1 = Reference temperature in degrees celsius.
T2 = Test temperature in degrees celsius.

Conformity and Linearity

Linearity
A specific type of conformity where the theoretical function characteristic is a straight line.

Mathematically:

\[ \frac{e}{E} = f(W) \pm C = A(W) + B \pm C \]

Where:
A is the given slope; B is given intercept at W=0.
W = Angle or slope

Absolute Linearity
The maximum deviation of the actual function characteristic from a fully defined straight reference line. It is expressed as a percentage of the Total Applied Voltage and measured over the Theoretical Electrical Travel. An Index Point on the actual output is required.
The straight reference line may be fully defined by specifying the low and high theoretical end Output Ratios separated by the Theoretical Electrical Travel. Unless otherwise specified, these end Output Ratios are 0.0 and 1.0 respectively.

Mathematically:

\[
\frac{e}{E} = A \left( \frac{W}{W_1} \right) + B \pm C
\]

Where:
A is the given slope; B is given intercept at \( W=0 \).
Unless otherwise specified: \( A=1; B=0 \)

Independent Linearity

The maximum deviation, expressed as a percent of the Total Applied Voltage, of the actual function characteristic from a straight reference line with its slope and position chosen to minimize deviations over the Actual Electrical Travel, or any specified portion thereof.

Note: End Voltage requirements, when specified, will limit the slope and position of the reference line.

Mathematically:

\[
\frac{e}{E} = P \left( \frac{W}{W_A} \right) + Q \pm C
\]

P is unspecified slope; Q is unspecified intercept at \( W=0 \). And both are chosen to minimize \( C \) but are limited by the End Voltage requirements.

**Figure 2**

**Absolute Linearity**

**Figure 3**

**Independent Linearity**
General Electrical Characteristics

Noise
Any spurious variation in the electrical output not present in the input, defined quantitatively in terms of an equivalent parasitic, transient resistance in ohms, appearing between the contact and the resistance element when the shaft is rotated or translated. The Equivalent Noise Resistance is defined independently of the resolution, the functional characteristics, and the total travel. The magnitude of the Equivalent Noise Resistance is the maximum departure from a specified reference line. The wiper of the potentiometer is required to be excited by a specified current and moved at a specified speed.

Output Smoothness
(Non-wirewound Potentiometers Only)
Output Smoothness is a measurement of any spurious variation in the electrical output not present in the input. It is expressed as a percentage of the Total Applied Voltage and measured for specified travel increments over the Theoretical Electrical Travel. Output Smoothness includes effects of contact resistance variations, resolution, and other micrononlinearities in the output.

Resolution
A measure of the sensitivity to which the Output Ratio of the potentiometer may be set.

Dielectric Strength
Ability to withstand under prescribed conditions, a specified potential of a given characteristic between the terminals of each cup and the exposed conducting surfaces of the potentiometer, or between the terminals of each cup and the terminals of every other cup in the gang without exceeding a specified leakage current value.

Insulation Resistance
The resistance to a specified impressed DC voltage between the terminals of each cup and the exposed conducting surfaces of the potentiometer, or between the terminals of each cup and the terminals of every other cup in the gang, under prescribed conditions.

Power Rating
The maximum power that a potentiometer can dissipate under specified conditions while meeting specified performance requirements.

Power Derating
The modification of the nominal power rating for various considerations such as Load Resistance, Output Slopes, Ganging, nonstandard environmental conditions and other factors.

Life
The number of shaft revolutions or translations obtainable under specific operating conditions and within specified allowable degradations of specific characteristics.

Mechanical Characteristics

Shaft Runout
The eccentricity of the shaft diameter with respect to the rotational axis of the shaft, measured at a specified distance from the end of the shaft. The body of the potentiometer is held fixed and the shaft is rotated with a specified load applied radially to the shaft. The eccentricity is expressed in inches, TIR.

Lateral Runout
The perpendicularity of the mounting surface with respect to the rotational axis of the shaft, measured on the mounting surface at a specified distance from the outside edge of the mounting surface. The shaft is held fixed and the body of the potentiometer is rotated with specified loads applied radially and axially to the body of the pot. The Lateral Runout is expressed in inches.

Shaft Radial Play
The total radial excursion of the shaft, measured at a specified distance from the front surface of the unit. A specified radial load is applied alternately in opposite directions at a specified point. Shaft Radial Play is expressed in inches.

Shaft End Play
The total axial excursion of the shaft, measured at the end of the shaft with a specified axial load supplied alternately in opposite directions. Shaft End Play is expressed in inches.

Starting Torque
The maximum moment in the clockwise and counterclockwise directions required to initiate shaft rotation anywhere in the Total Mechanical Travel.

Running Torque
The maximum moment in the clockwise and counterclockwise directions required to sustain uniform shaft rotation at a specified speed throughout the Total Mechanical Travel.

Moment of Inertia
The mass moment of inertia of the rotating elements of the potentiometer about their rotational axis.

Static Stop Strength
The maximum static load that can be applied to the shaft at each mechanical stop for a specified period of time without permanent change of the stop positions greater than specified.

Dynamic Stop Strength
The inertia load, at a specified shaft velocity and a specified number of impacts, that can be applied to the shaft at each stop without a permanent change of the stop position greater than specified.
Orders

All orders are subject to acceptance by State Electronics, E. Hanover, NJ. No order or contract shall be deemed accepted unless and until such acceptance is made in writing by State Electronics.

All agreements are more contingent upon strikes, accidents or causes of delay beyond our control.

Prices and Specifications

Prices, quotations, specifications and other terms and all statements appearing in the Company's catalogs and advertisements, and otherwise made by the Company, are subject to change without notice. State Electronics reserves the right to make changes in design at any time without incurring any obligation to provide same units previously purchased or to continue to supply discontinued items. The specifications shown in the sales literature are not always the latest version. Certified current specification prints are available upon request.

Unless specifically provided in writing, prices quoted are based upon manufacture of quantities and types originally specified and are subject to revision when interpretation or engineering changes are initiated by the customer. Quoted prices are based upon present cost of materials and labor and are subject to change without notice.

We are not responsible for typographical errors made in any of our publications or for stenographic or clerical errors made in preparations of quotations, all such errors are subject to correction.

Delivery

Delivery promise is based on our best estimate of the date material will be shipped from our factory and we assume no responsibility for losses, damage or consequential damages due to delays.

Terms of Payment

On approved orders, terms are net thirty (30) days from the date of invoice. The Company may at any time, when in its opinion the financial condition of the customer warrants it, either hold or suspend credit. In cases where credit is not established or satisfactory financial information is not available, the terms are credit card or bank transfer. Each shipment will be considered a separate and independent transaction and payment should be made accordingly.

Shipments

All shipments are made F.O.B. shipping point (unless otherwise specified) and packaging for domestic shipment is included in the quoted price. When special domestic or export packaging is specified involving greater expense than is customary, a charge will be made to cover such extra expense. Unless otherwise specified, we will normally use the best, least expensive surface transportation. Reasonable care is exercised in packaging our products for shipment and no responsibility is assumed by the Company for delay, breakage or damage after having made delivery in good order to the carrier. All claims for breakage or damage should be made to the carrier, but will be glad to render all possible assistance in securing satisfactory adjustment of such claims.

Claims and Rejected Material

Claims for defective material must be made within 30-days of the customer’s receipt of shipment.
No products may be returned without a return authorization (RMA).

Country of Origin

The 388 / 389 and 70 series Mod-Pot products are assembled in the United States at our facility located in East Hanover, New Jersey, USA, using components parts manufactured by the Sensing and Control Division of Honeywell International headquartered in Morris Township, New Jersey, USA.
DISCLAIMER

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

State Electronics Parts Corp., Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, “State Electronics”), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product. State Electronics makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product.

To the maximum extent permitted by applicable law, State Electronics disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on State Electronics' knowledge of typical requirements that are often placed on State Electronics products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer’s responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer’s technical experts. Product specifications do not expand or otherwise modify State Electronics' terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, State Electronics products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the State Electronics product could result in personal injury or death. Customers using or selling State Electronics products not expressly indicated for use in such applications do so at their own risk. Please contact authorized State Electronics personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of State Electronics. Product names and markings noted herein may be trademarks of their respective owners.
